

Rum Raisin Custard

- 3 cups low-fat milk
- 1/2 cup golden raisins
- 1/4 cup sugar
- 2 tablespoons cornstarch
- 1/4 teaspoon salt
- 1 egg, beaten
- 3/4 cup cooked rice
- 1 1/2 teaspoons rum extract

Heat milk in a large saucepan over medium heat until bubbles appear around the edge. Place raisins in a bowl. Pour hot milk over raisins. Let stand 15 minutes.

Combine sugar, cornstarch and salt in saucepan. Stir in beaten egg. Gradually stir warm milk mixture into egg mixture.

Cook custard over medium heat, stirring constantly, until thickened. Stir in cooked rice and rum extract.

Spoon custard into dessert bowls. Serve warm or well-chilled. Yields 6 2/3-cup servings.

Orange Blossom Shake

- 1/2 cup frozen orange juice concentrate
- 1 cup low-fat milk (2 percent)
- 1 egg white
- 1 teaspoon vanilla
- 6 ice cubes

Combine all ingredients in a blender. Puree until smooth and foamy. Serve at once. Yields 3 servings.

Per serving: 100 calories, 5 grams protein, 16 grams carbohydrate, 2 grams fat, 6 milligrams cholesterol, 60 milligrams sodium. 1 serving equals 1/2 meat, 1/2 milk, 1 fruit.

Caramel Sauce

For vanilla, banana, pineapple, coconut and chocolate ice cream.

- 1/2 cup sugar
- 1/2 cup white corn syrup
- 1/4 cup better or margarine
- 1 cup half-and-half
- 1 teaspoon vanilla

In a saucepan place sugar, syrup, butter and 1/2 cup cream. Cook slowly, stirring frequently, until a little mixture dropped in cold water forms a hard ball. Add 1/2 cup cream and cook until a little mixture forms a thread when dropped from a spoon. Remove from heat and stir in vanilla. Serve warm. Yields about 1 1/2 cups.

Glazed Rock Cornish Hens

- 1/4 cup strawberry jelly
- 3 tablespoons strawberry vinegar
- * Salt and pepper to taste
- * Parsley

Mix jelly and vinegar together until well-blended. Rub hens inside and out with salt and pepper. Place on rack in shallow baking pan. Roast at 350 degrees for 30 minutes, then brush all over with glaze. Continue roasting for 30 minutes more, brushing frequently with glaze. Garnish with parsley and fresh strawberries, when available.

Off-Road Vehicle Users Fined For Damage

Two Prairie City, Oregon individuals plead guilty in Federal court on November 9 to charges of destruction of vegetative resource. Curt Clark and a juvenile were each fined \$100 and ordered to pay an additional \$100 restitution. The charges resulted from an investigation by Forest Service officers following destruction of a meadow north of Prairie City along Dixie Creek.

The question of constructing a hi-power rifle range on Virtue Flat for use by local sportsmen and the Oregon National Guard was considered at a meeting held in the Baker National Guard Armory during March 1956. Preliminary surveys were made, but nothing further was accomplished.

In 1964 Fred Kohler, president of the Powder River Sportsmen's Club, with the club's approval revived the rifle range project. A lease on 25 acres, north of the Virtue Flat highway, was obtained from the Bureau of Land Management by the club. However, nothing much was accomplished other than a ground breaking ceremony held in May 1965 with World War II Ace Col. Hubert Zemke lifting up the first shovel full of dirt.

Finally, Anthony Brandenthaler of Burnt River Lumber Co., and Sig Ellingson of Ellingson Lumber Co. became interested.

Under supervision of Elton Saunders, engineer from Ellingson, equipment and men from this company dug the target pit and erected firing points at 100, 200, 300, 600 and 1,000 yards. George Reed and Baker county furnished equipment and materials to construct the road paralleling the range to the target pits.

On May 12 and 13, 1968, the range was officially opened and dedicated with the club's first registered National Rifle Association rifle match, fired at 200, 300, 600 and 1,000 yards.

Forty one shooters registered and shot, 6 local and 35 visitors from Utah, Oregon, and including an 8th Army rifle team from California.

After the matches were fired the range was dedicated with Jesse Himmelsbach, Jr., presiding. The range was blessed by Father Calvin Schwenk, a life member of the NRA, who represented the Baker Ministerial Association.

Grant Sanborn, National Rifle Association Field Representative gave a short talk. He said that "It was a very nice shoot. This is a beautiful range and has great possibilities for the future."

The Powder River Sportsmen's Club had a lot to do with getting the Oregon Wildlife Federation back on its feet and getting its newspaper, "The Resource Review" started. In 1967, at a meeting in Portland, Governor McCall presented the Powder River Sportsmen's Club a Conservation Organization Award by the Oregon Wildlife Federation in cooperation with the National Wildlife Federation and the Sears-Roebuck Foundations for "the Wise Use and Management of the Nation's Natural Resources."

Teaching Hunter Safety has always been one of the club's favorite projects. Probably over 1,000 young people have taken and passed Hunter Safety classes sponsored by the club.

HUNTER SAFETY class at Powder River Sportsmen's rifle range

The club, with other interested organizations, fought and defeated an anti-trapping initiative law.

During the hard winter of 1984-85, members of the club put in over 5,400 hours feeding game, constructed and put out deer and bird feeding containers. During this time over 27 tons of grain was put out for the game.

This year the club gave the county \$1,000 to trap coyotes. It made a substantial contribution toward establishment of the Deschutes River Park or Wildlife area.

The charter members of the club understood that the name of the game "is politics" and knew how to play it. Three of its members, Delbert Gildersleeve, Wayne Phillips, Sr., and John Amacher served on the Oregon State Game Commission. Senator Morse and Senator Neuberger both held Honorary Memberships in the club. Senator Morse directed one of his assistants that a copy of the Powder River Sportsmen should be placed on his desk every month.

The club aided in electing Al Ullman. The issue of that day was a gigantic land steal which Al opposed. The Land Tenancy Act would have given to livestock interests practically all the National Forests and Bureau of Land Management lands.

of O&C land and timber in each county when the system was first set up.

On this basis, Douglas County gained the largest share, \$17,139,744.40, followed by Jackson County with \$10,721,748.29, and Lane County with \$10,448,059.76.

Luscher said, "We recognize the economic importance of these payments to Oregon counties. This timber harvest income contributes a great deal to county operations in addition to the direct effect of logging and wood product manufacture to the entire region."

Payments

Benton	\$1,922,661.95
Clackamas	3,797,428.40
Columbia	1,405,114.67
Coos	4,036,905.86

Polk	1,477,918.08
Tillamook	383,163.94
Washington	431,059.44
Yamhill	492,639.38
Total	\$68,347,121.39

Fish Ladder Solves Low Water Problem

ROSEBURG—Lack of precipitation this year has had an impact on several BLM programs. On the North Umpqua River, unseasonably low flows aggravated a fish passage problem at Deadline Falls.

Under normal circumstances, the falls is a minor obstacle to passage of spring chinook salmon and steelhead trout. However, this year the river level dropped precipitously in June and a change in the channel altered the normal flow pattern. This created a bottleneck to a large portion of the spring chinook run destined for upper reaches of the North Umpqua System.

Dave Anderson, Oregon department of Fish and Wildlife (ODF&W) fisheries biologist brought the problem to the attention of Dave Baker, BLM's Roseburg district North Umpqua resource area manager early this summer. A course of action was quickly agreed upon and within several weeks a 50-foot fish ladder was constructed around the falls.

More Coho Return

Fisheries enhancement work in three streams in Lobster Valley is underway in BLM's Salem district Alsea resource area in Lane and Benton Counties. Cost of the 1987 projects will be \$20,000. They involve placing log sills and boulder berms to create gravel beds for spawning coho and chinook salmon. A similar project in the area on a part of the East Fork Lobster Creek in 1981 resulted in an adult coho return 6 times greater than control areas within the Lobster Creek drainage. The streams in the 1987 project are Lobster, East Fork Lobster and J-Line Creeks.
